Demolishes Boat Complete Arrangements for Putting Result of Re-cent Vote into Effect Creating Terror

MONTAUK, N.Y., July 24 .- A gigantic gigantic swordfish, weighing nearly half a ton, this afternoon caused a panic in Montauk Bay when, maddened by a lance thrust, it turned on its attackers and demolished a fishing boat and demolished a fishing boat by cutting most of the bottom away, throwing the crew into the water. [sporing the strug, gling men, the monster charged other boats in the vicinity and sent them scampering to all parts of the bay, Finally a fish erman pulled out in a power traveler and succeeded in killing the fish after ten minutes of shootting.

#### WEDNESDAY, JULY 25, 1923

#### A MISS-FIRE

A MISS-PIRE

The legislation to control grain rates on the great lakes has proven not only singularly ineffective, but is seriously harmful, to the farming interents of the prairies. The shipping combine has refused to quote any rates up to the present, and contrasts for seaboard delivery cannot be made as a result. The Winnipeg Tribune says that "One Exporter, who has not been able to "secure tonnage for a week or more, has already "dropped 10 cents a bushel upon the carge he "had ready for shipment, and feeling is de-"veloping acutely among the export firms."

#### DEFYING REGULATIONS?

If the lake shipping companies will not carry western grain at rates fixed by the board of grain It me sake snipping companies with not carry watering rain at rates fixed by the board of grain the support accorded this resolution is entirely commissioners, Sir Henry Thoraton asya vessels lef the Government Merchant Marrine will be brought into the service. That could be expected, When Parliament placed the control of lake rate of convention to be passed on to the general convention. When Parliament placed the control of lake rate of the following on consideration 1 And again, When Parliament placed the control of lake rates in charge of the commission it was not with the object of making the grain carriers unprofitions, and it is to be supposed that the commissioners will regulate the rates with a view to leaving of the Osminon was seriously discussed in the owners a fair return on their investment. That they are entitled to, and neither the grain-growers nor any other responsible class of people have sug-gested that they should be expected to build ships and run them for nothing. But what Parliament did intend was that the ship-owners should not being used as places in which to preach the gospel shorb the profits of the Western crop, as they of national disruption. did last year, by holding up the traffic for all it would beer, and more than it could be made to

#### GETTING SORRY ABOUT IT.

tarmers are doing their selling in Britain the which Parlament has refused to sanction tendency is to do their buying there, instead of in the United States II any party in the U.S. profits by the exclusion it is the rancher who produces

Current Comment feeder stock, and the Federation claims that any benefit he has got from the arrangement is not important enough to off-set the losses suffered by other classes. The Federation is supposed to eximportant enough to off-set the losses suffered by other clauses. The Federation is supposed to express the views of farmers and farm organizations in all parts of the republic. It is quite possible that its sentiment in this matter would not be endorsed by the rancher who turns off feder tock, but he south-mothered and in the long or the check but he is out-numbered and in the long or the control of the sentence of the two wings of the check but he were tariff in supposed to have given the control of the control of the control of the check but he was presented by the rancher who turns off feder tock, but he we tariff in supposed to have given the control of the control of the control of the control of the check of the control of the control of the control of the control of the check of the control of the check of the control of the check of the check

#### WHY NOT TRY IT?

The city council has decided to fill up the holes in the Alberta avenue pavement, if the taxpayers will vote authority to borrow the money. What to fill them with seems to be an unsettled question.

In that connection it is in order to recall that there
should not be any necessity of making extensive
repairs to that stretch of paving now nor for repairs to that stretch of paving now nor for years to come; but there has been need of it for years past. In places the street can be mavigated only at the peril of conveyance and passengers. It seems quite clear that the paving was not properly laid, or that a concrete surface is not very suitable for a street in this country that has to sustain heavy traffic. If repairs are to be made that would seem to be a good place to give the northern tar sands a thorough try-out. The wall composed of this material that was put down in front of the manufacturers' building at the Jair grounds a couple of weeks ago looks well, but has not been stubject to the wear and tear of hard uaage. It is desirable to find out at an early date by actual trial how the substance will behave by actual trial how the substance will behave under the grind of heavily laden trucks and con-tinuous motor car traffic, particularly on a street traversed by street car tracks. In any case the tar sands could scarcely be less satisfactory than the concrete has been on Alberta avenue, and if the material will stand the test there it can be depended upon almost anywhere.

#### THE GOSPEL OF NATIONAL DISRUPTION

The Victoria U.F.A. federal district association held its annual convention in Camrose on July 6th. Hon. V. W. Smith, minister of railways and telephones in the Alberta government was present.

A vote of appreciation to Mr. Smith and to the
Alberta government was carried, The U.F.A." of July 16th gives the foregoing information. The report concludes with the following paragraph:

ized by verbal camouflage. But the fact remains that the gospel of despair having been preached in order to secure political dominance for the U.F.A. its lodge rooms and conventions are now

absorb the profits of the Western crop, as they did last year, by holding up the traffic for all it would beer, and more than it could be made to bear without beating the producers and dealers out of profits to which they were fairly warrant od. If the shipping interests will not operate they will not be means will have to be found for moving the whoat crop. It is hardly likely that this dispitant is a five-and-it-clive rates other means will have to be found for moving the whoat form to be the control or the warrant of the control or the warrant of the control or the control of the profession. It is regretable that the Senate release, the control of the con of railways where these are required. If officials of the system could get around a decision of Parof the system could get around a decision of Par-liament by any species of financial jugglery there would be an end of public control over that vast CETTING SORRY ABOUT IT.

The American Farm Bureau Federation has called that the "protective" tariff which show Canadian cattle out of the United States has done the cattlemen of the republic hitte or no good and much harm. Canadian cattle which formerly twent to the United States are now going to Samuel to the United States are now going to Samuel to the United States are now going to Samuel to the United States are now going to Samuel to the United States are now going to Samuel to the United States are now going to Samuel to the United States are now going to Samuel to the United States are any going to Samuel to the United States are any going to Samuel to the United States are any going to Samuel to Sa dian feeders per year, which they used to turn even more desirable and necessary that respon-into beef for sale abroad. And the Canadian sible government be preserved. Sir Henry Thorn sattle, fattened in Britain, compete in the markets to no is hardly the man to be a party to any scheme there with U.S. beef products. And as Canadian for pledging the credit of the public for purposes
